

The background features a vibrant, multi-colored gradient. It starts with a dark blue on the left, transitions through purple and magenta, and then into bright orange and yellow towards the right. A diagonal line separates the darker blue on the left from the lighter colors on the right.

CON417-R

Live debug microservice running on Kubernetes cluster

Prabhat Sharma

Senior Solutions Architect
Amazon Web Services

Repeat sessions

CON417-R Live debug microservice running on Kubernetes cluster

December 2, 2019 (Monday) 2:30 p.m. – Aria, Level 1 West, Bristlecone 2 – Table 2

CON417-R1 Live debug microservice running on Kubernetes cluster

December 3, 2019 (Tuesday) 11:30 a.m. – Mirage, Events Center C1 – Table 1

CON417-R2 Live debug microservice running on Kubernetes cluster

December 4, 2019 (Wednesday) 4:00 p.m. – Mirage, Events Center C1 – Table 1

CON417-R3 Live debug microservice running on Kubernetes cluster

December 5, 2019 (Thursday) 11:30 a.m. – Mirage, Events Center C1 – Table 2

Agenda

1. Traditional development workflow
2. Painful development workflow in Kubernetes
3. Reasons for painful process
4. Dev-friendly development workflow in Kubernetes
5. Tools to rescue
6. Demo

Traditional monolithic development workflow

Develop

Develop locally

Test

Test locally

Deploy

Deploy to remote server

Painful development workflow in Kubernetes

Develop

Develop locally

Build image

Build and push Docker image

Deploy

Deploy to remote server

Test

Test with remote services

Repeat

Reasons for painful process

1. Multiple dependent microservices
2. Local setup challenges for various services
3. Separate IP range for remote cluster
4. Databases in the mix

Dev-friendly development workflow in Kubernetes

Develop

Develop locally

Test

Test locally with remote services

Build image

Build and push Docker image

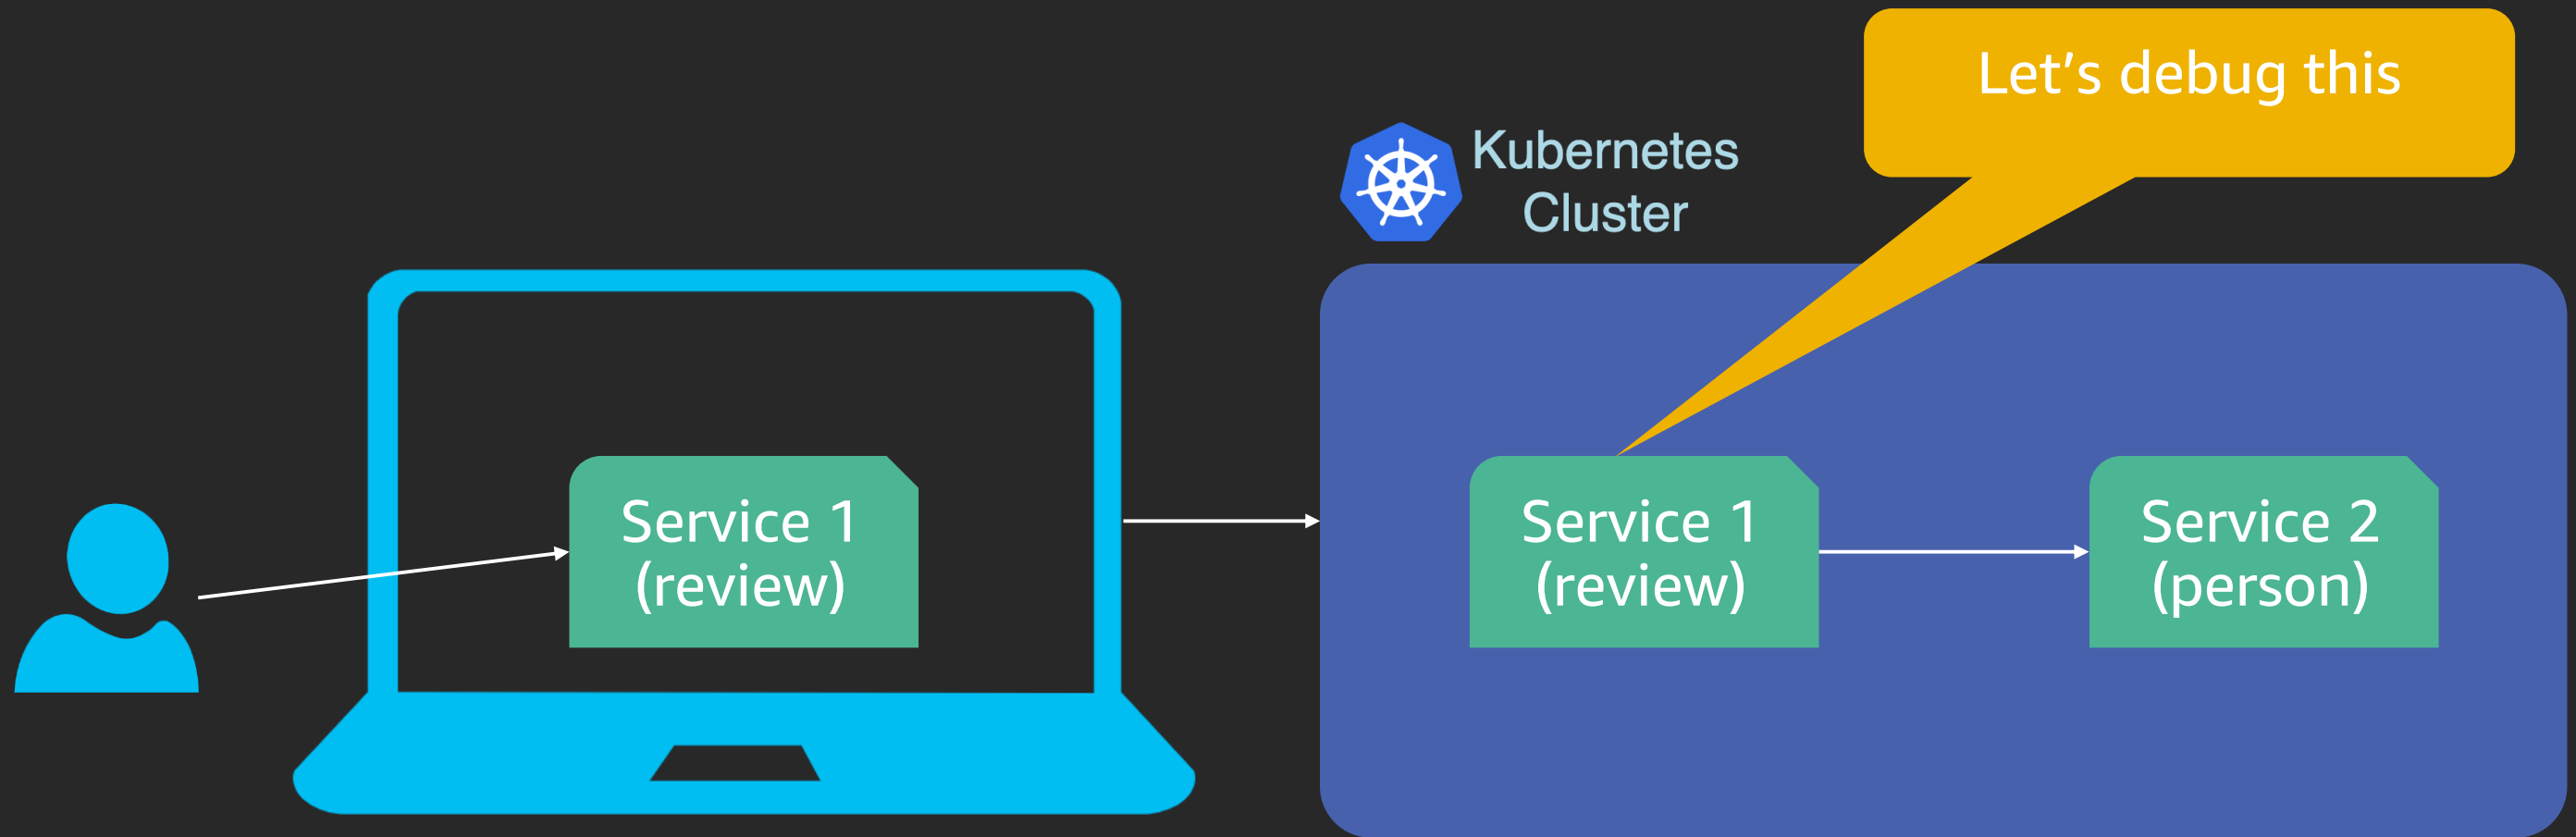

Deploy

Deploy to remote server

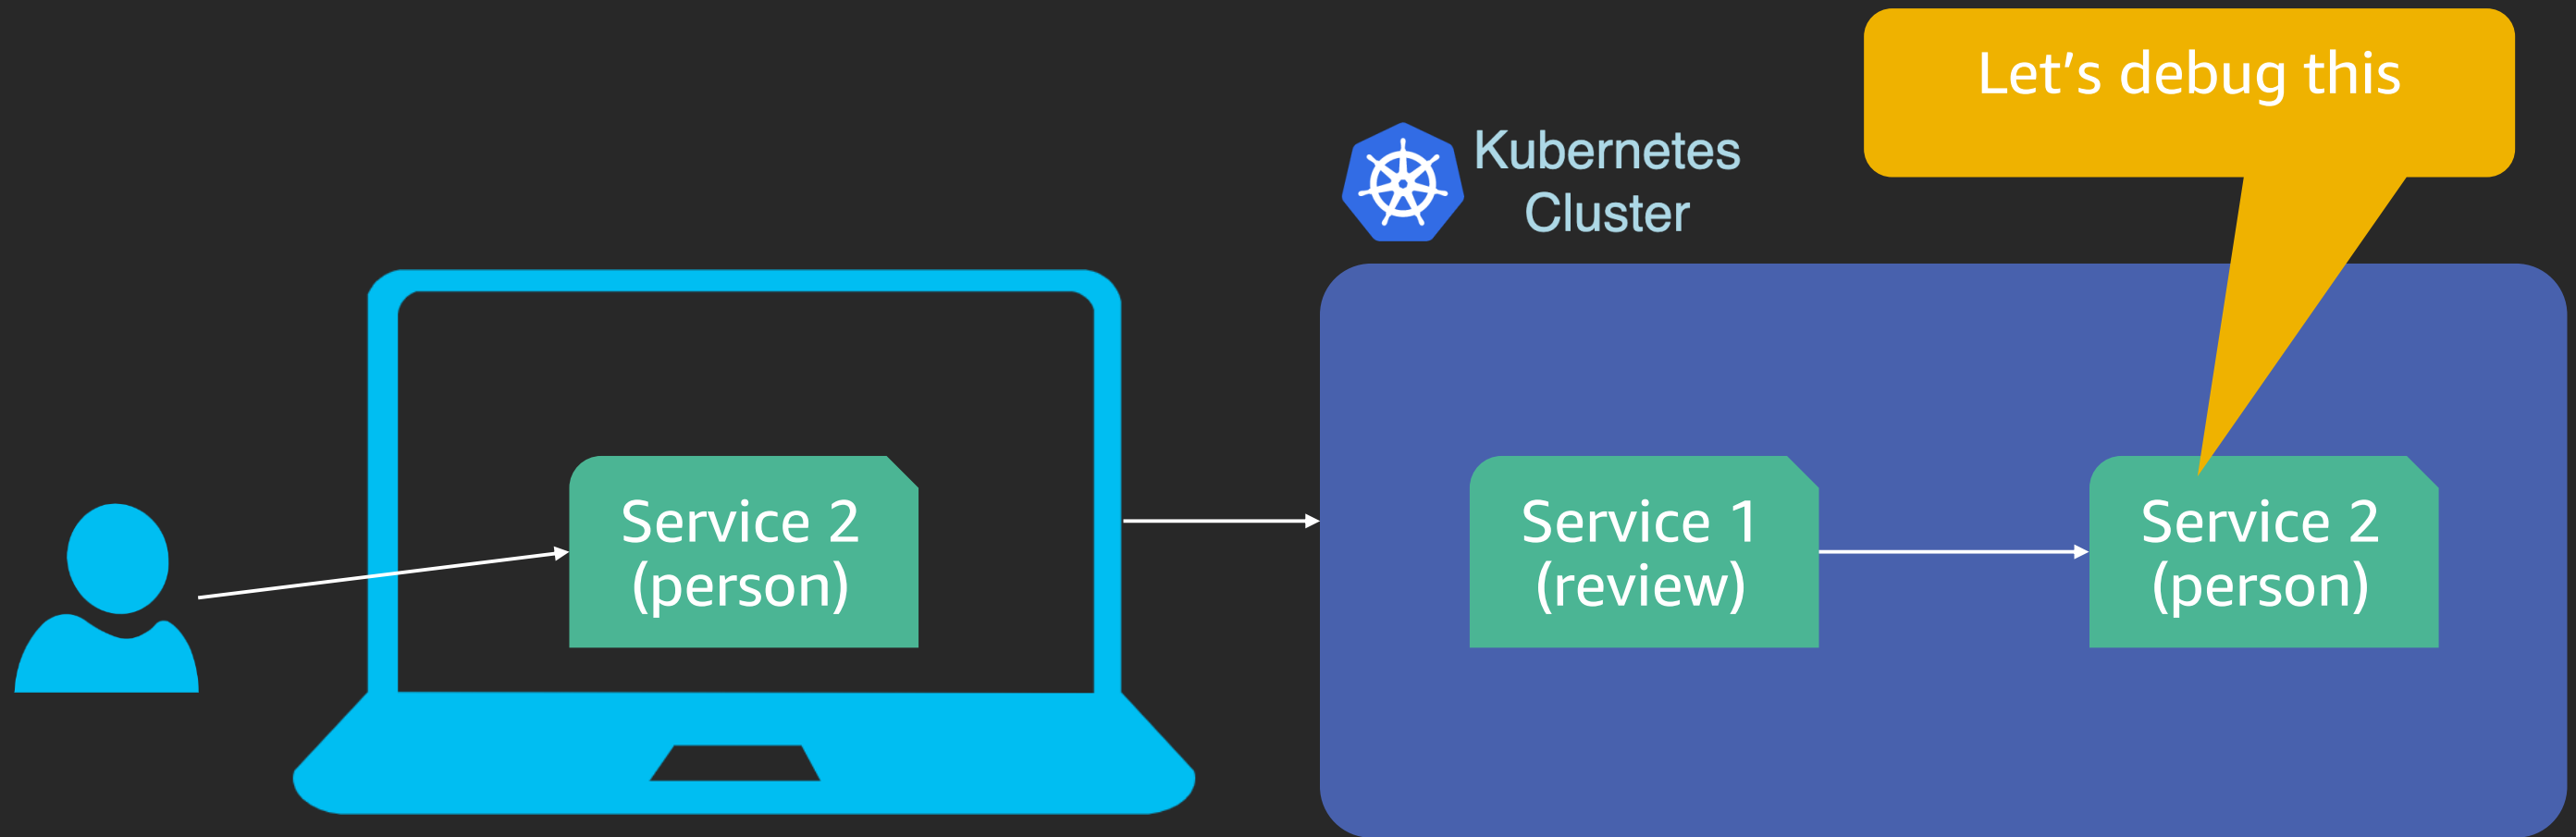

Tools to rescue

Scenario 1 – Live debug service 1 – VPN

Scenario 2 – Live debug service 2 – VPN + pod swap

Demo

Thank you!
